Ms. Janet Feldstein  
Site Compliance Branch  
Emergency and Remedial Response Division  
U.S. Environmental Protection Agency  
26 Federal Plaza  
New York, New York 10278

Dear Ms. Feldstein:

Re: SCP Carlstadt Site  
RI Report Addendum No. 2

Please be advised of the following comments pertaining to the above referenced document submitted to this office on July 22, 1988.

General Comment

This document has inadequate explanations and conclusions in its discussion sections.

Specific Comments

Section 2.0, Pages 1 and 2:

The addendum states "... the combined effect of the sewer line and the mosquito control trenches... is significant." How is the effect significant? In addition, the ground water flow pattern is described as complex. How and why this is so must be explained.

Section 3.1, page 4:

The bedrock surface, especially the dip, must be more fully discussed in the text.

Table 1:

Raw data should be provided in tabular form in the appendices.
